

## The Casualty Actuarial Society

*Leading the Way in General Insurance*

*The CAS is the world's only actuarial organization focused exclusively on general insurance. We equip professionals with the skills, credentials, and insights needed to lead in today's rapidly evolving risk landscape.*

### Learn more about becoming a CAS member

**Credentialing Pathway:** Aspiring actuaries must pass a series of exams to become credentialed CAS members. The [requirements outlined here](#) will help guide you toward the highly coveted Associate (ACAS) and Fellow (FCAS) designations.

**International Exam Discounts:** Our [Assistance Qualified Countries discount program](#) helps candidates around the world afford the cost of becoming a CAS member by offering up to 75% discount on exam fees and DISC registration fees.

**Exam Waivers:** Candidates who have earned exam credits from other actuarial associations may qualify for waivers for some basic education requirements. Review the [CAS waiver policy](#) for more specific information.

**Affiliate Membership:** Practicing actuaries may qualify to become an [Affiliate member of the CAS](#), gaining access to CAS publications, resources, and networking opportunities. Most applicants from Africa will qualify for discounts on membership fees.

---

### The CAS Institute

*The CAS Institute (iCAS) is a subsidiary of the CAS offering specialty credentials that are separate from actuarial credentials and are designed for any professional seeking specialized recognition in quantitative practice areas such as predictive analytics, data science and catastrophe model analytics. Professionals can leverage this recognition in order to enhance their skills, set themselves apart from other professionals, secure additional job duties, attract premium compensation and/or advance their careers.*

**Certified Specialist in Predictive Analytics (CSPA):** The [CSPA credential](#) offers analytics professionals and their employers the opportunity to certify skills specifically as applied to property – casualty insurance. The program focuses on insurance and technical knowledge, and includes a project to challenge candidates to use what they have learned to address a real-world scenario.

**AI Fast Track:** Offered as an [on-demand course](#), resulting in a certificate in Advanced AI for Actuarial Science. The [AI Compendium](#) consists of six sessions and provides participants with practical insights and AI applications to enhance work efficiency and innovation.

**The Almost Nowhere Podcast:** Tune in to the [Almost Nowhere podcast](#) to learn more about the intersection of AI, data science, and actuarial science within the general insurance industry.

## CAS Education Resources

### CAS P&C Actuarial Essential Program

This program is an on-demand learning experience designed to provide a clear, structured introduction to the general insurance industry and the work of P&C actuaries.

Learners build foundational knowledge, strengthen early-career readiness, and gain exposure to the core areas of actuarial work, pricing, reserving, data visualization, predictive modelling, and introductory Excel skills, to better understand what entry-level P&C actuarial roles involve. Participants who complete the program earn a certificate of completion.

### CAS Online Learning Center

This online learning center provides a premiere opportunity for anyone interested in actuarial practice, to receive superior professional education. The center provides live webinars, on-demand courses, product bundles, micro learning courses and more.

## CAS Publications

### CAS Research

The CAS Climate Change Resource Library hosts recent climate change-related research and professional education features papers, presentations, and recordings from CAS publications and meetings, as well as interviews and press related to the topic.

<https://www.casact.org/publications-research/research/climate-change-resource-library>

You could also find past and recently completed research paper here:

<https://www.casact.org/publications-research/research/past-research-projects>

## **Variance**

*Variance* is a peer-reviewed, open-access journal that disseminates original practical and theoretical research in casualty actuarial science. Articles are continuously published throughout the year in a single volume. At the start of every year, a new volume is begun. These articles are freely available to read; there are no subscription fees or pay-per-view fees to access articles published in *Variance*.

<https://www.casact.org/variance>

## **Monographs**

CAS monographs are authoritative, peer-reviewed, in-depth works focusing on important topics within property and casualty actuarial practice. The inaugural monograph, Stochastic Loss Reserving Using Bayesian MCMC Models, was published in January 2015.

The CAS Monograph Series initiative fulfills the goal of creating an important addition to the existing body of CAS literature, with each monograph enabling the comprehensive treatment of a single subject.

The monographs represent just one way that the CAS provides its members with access to relevant information, research and resources that they can apply directly on the job to advance in their careers.
