Society of Actuaries

A Joint Study by SOA and ReMark

22 Global Markets Consumer Behavior

Overview – Global Insurance Demand Trends

- 1. Introduction
- 2. Questions & Data
- 3. Economic Analysis Global
- 4. Data Analytics Global
- 5. Key Findings
- 6. Conclusion

Introduction

Objective: Examine consumer propensity to buy life/health insurance

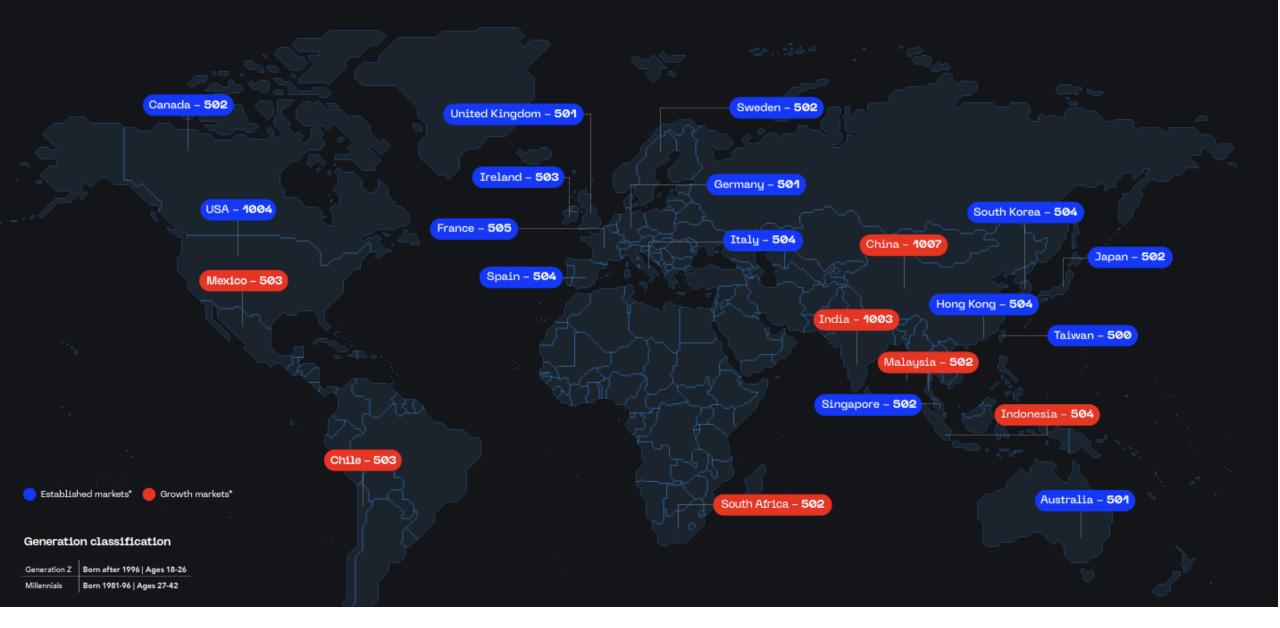

Collaboration: Joint research study by Remark (a SCOR Group Company) and the Society of Actuaries (SOA)

Scope: Market insights gathered from 22 countries

Methodology:

- Empirical analysis with data-driven insights
- Blend of quantitative measures and qualitative observations
- Structured to capture a holistic view of consumer behavior
- Cross-sectional survey design for robust comparative analysis

Survey Questions

Demographics: Collecting basic demographic information such as country, age, and gender.

Insurance Preferences:

- Types of personal insurance currently held (home, car, pet, travel, mobile phone, etc.).
- Recent insurance purchases and whether they were mandatory.
- Types of personal health or life insurance held.

Personal and Professional Context:

- Working status, main source of income, industry category.
- Marital and parental status, residential status.

Survey Questions (2)

Consumer Behavior & Digital Trends:

- Willingness to buy from online-only insurers.
- Importance of factors in the buying process (trustworthiness, transparency, etc.).
- Engagement with extended warranty offers and reasons for refusal.

Lifestyle and Wellness:

- Role of healthy living, average sleep hours, risk appetite, average daily steps, exercise frequency.
- Diet quality and lifestyle improvement desires (exercise, sleep, stress, etc.).
- Usage of wellness tools (wearable devices, fitness apps, home gym, etc.).

I live with my parents/family home. I live in a rented multi-person household such as a flat share or hous Other (please specify) I live with my partner/spouse in accommodation rented from a private I live by myself in accommodation rented from a private landlord I live in accommodation rented from the government (e.g. Local Authori I own my property, but am still paying a mortgage

I own my property outright

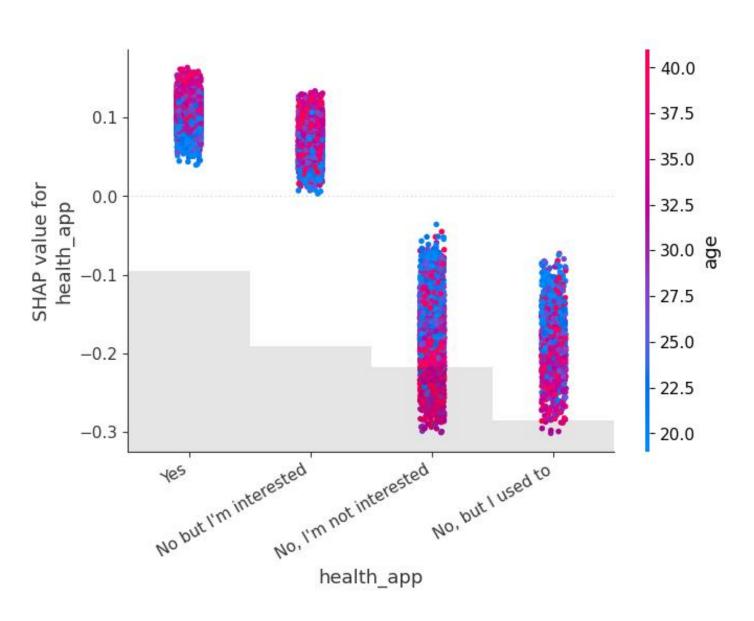

Data Analytics (5)

Data Analytics (6)

• Middle-aged demographic, demonstrating an interest in their health are more likely to recent purchase insurance

Conclusion

- Individuals with greater knowledge of insurance products, particularly those who are married and property owners, are more likely to possess life and health insurance.
- Employment status significantly influences insurance coverage, with employed or semi-employed individuals showing a higher propensity to secure life insurance.
- The analysis indicates a demographic trend where older individuals are more inclined to purchase life insurance, while younger individuals are more likely to buy health insurance, driven by their knowledge and recent claims experience.
- Urban residents, especially those who own property or have mortgages, demonstrate a higher likelihood of recent insurance purchases, underscoring the impact of residential and financial stability on insurance decisions.
- The use of health applications correlates with insurance purchasing among the middle-aged, suggesting that digital health engagement enhances the perceived value and relevance of insurance coverage.

Thank you

SOA Antitrust Compliance Guidelines

Active participation in the Society of Actuaries is an important aspect of membership. While the positive contributions of professional societies and associations are well-recognized and encouraged, association activities are vulnerable to close antitrust scrutiny. By their very nature, associations bring together industry competitors and other market participants. The United States antitrust laws aim to protect consumers by preserving the free economy and prohibiting anti-competitive business practices; they promote competition. There are both state and federal antitrust laws, although state antitrust laws closely follow federal law. The Sherman Act, is the primary U.S. antitrust law pertaining to association activities. The Sherman Act prohibits every contract, combination or conspiracy that places an unreasonable restraint on trade. There are, however, some activities that are illegal under all circumstances, such as price fixing, market allocation and collusive bidding.

There is no safe harbor under the antitrust law for professional association activities. Therefore, association meeting participants should refrain from discussing any activity that could potentially be construed as having an anti-competitive effect. Discussions relating to product or service pricing, market allocations, membership restrictions, product standardization or other conditions on trade could arguably be perceived as a restraint on trade and may expose the SOA and its members to antitrust enforcement procedures.

While participating in all SOA in person meetings, webinars, teleconferences or side discussions, you should avoid discussing competitively sensitive information with competitors and follow these guidelines:

- Do not discuss prices for services or products or anything else that might affect prices
- Do not discuss what you or other entities plan to do in a particular geographic or product markets or with particular customers.
- Do not speak on behalf of the SOA or any of its committees unless specifically authorized to do so.
- Do leave a meeting where any anticompetitive pricing or market allocation discussion occurs.
- Do alert SOA staff and/or legal counsel to any concerning discussions
- Do consult with legal counsel before raising any matter or making a statement that may involve competitively sensitive information.

Adherence to these guidelines involves not only avoidance of antitrust violations, but avoidance of behavior which might be so construed. These guidelines only provide an overview of prohibited activities. SOA legal counsel reviews meeting agenda and materials as deemed appropriate and any discussion that departs from the formal agenda should be scrutinized carefully. Antitrust compliance is everyone's responsibility; however, please seek legal counsel if you have any questions or concerns.
